

Site

Badin Lake in Stanly and Montgomery Counties

Pollutant – Polychlorinated Biphenyls (PCBs)

Date Issued – February 11, 2009

Advisory

Elevated levels of chemicals called PCBs, along with mercury, may be found in **catfish and large mouth bass** in these waters. Pregnant women, women who may become pregnant, and children under 15 should avoid eating catfish and large mouth bass from this lake due to high levels of mercury as well as PCBs. Other people should eat no more than one meal per week of catfish and large mouth bass from this lake.

Please also see statewide and regional mercury advisories.
